Request for Correction of Errors in the Office Action

The Applicant believes that the Office action of February 21, 2008 has errors that affect Applicant's ability to reply including ambiguities, omissions of reasoning, and omissions of contentions critical to understanding the rejections. The law requires:

Whenever, on examination, any claim for a patent is rejected . . . the [Office] shall notify the Applicant thereof, stating the reasons for such rejection, or objection or requirement, together with such information and references as may be useful in judging of the propriety of continuing the prosecution of his application

35 USC 132(a) (emphasis added). By withholding, or failing to state with adequate clarity, elements of the Examiner's rejections and non-self-evident reasons behind the Examiner's action, the Examiner denies Applicant the opportunity to judge at this stage the strength of the Examiner's position and make a logical decision as to whether to continue the prosecution.

With this submission, the Applicant calls errors in the preceding Office action to the attention of the Office and requests correction. Applicant also requests a new time period for reply as provided by M.P.E.P. § 710.06. To the extent that the thrust of any of the rejections has changed since the first Office action for reasons unrelated to Applicant's amendments, the Applicant requests that the Office action be made non-final.
